Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1614

Claims 108, 109, 112, 113 ¹³² and ^{and} 115-130 are presented for examination.

The amendments and remarks filed on June 21, 2004 have been received and entered.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 108, 109 and 116 rejected under 35 U.S.C. 103(a) as being unpatentable over WO 91/12808. The WO patent teaches the use of phospholipid in a pharmaceutical formulation as a tear substitute, agents for treating dry eye, a lubricant for intra-ocular lenses in post cataract surgery and for the treatment of conjunctivitis and inflammatory conditions of the eye. See the abstract and page 3, lines 3-10. The above reference differs from the claimed invention in the different causes for corneal epithelial defect. It would have been obvious to a person skilled in the art to employ the claimed phospholipid for the treatment of damage to corneal epithelial caused by any source, considering the protective and lubricating activity of such agent is taught by the prior art. One skilled in the art would have been motivated to employ the teachings of the above reference, since it relates to the use of phospholipid as a lubricating agent used for the treatment of conditions such as dry eye or wearing a contact lens which causes abrasion and damage to corneal epithelial. To use a well known ophthalmic lubricating agent for the protection and treatment of damage to corneal epithelial caused by any reason is considered to be within the skill of artisan in the absence of evidence to the contrary. Applicant has presented no evidence to establish the unexpected or

unobvious nature of the claimed invention, and as such, claims 108, 109 and 116 are properly rejected under 35 U.S.C. 103.

Claims 112, 113, 115, 117-130 and 132 are objected to as being dependent on a rejected claim.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zohreh Fay whose telephone number is (571) 272-0573. The examiner can normally be reached on 9:30-6:00.
